Overview

This HR Dashboard provides a comprehensive analysis of employee workforce data to support strategic HR decision-making. The dashboard enables users to monitor employee headcount, hiring trends, gender diversity, age distribution, business unit performance, and country-wise workforce allocation through interactive visualizations. The project was developed using Microsoft Power BI with Excel as the primary data source. Data transformation and cleaning were performed using Power Query, while DAX measures were used to create KPIs and analytical calculations. This dashboard helps HR teams to Track workforce growth trends, Analyze employee demographics, Monitor departmental distribution, Improve workforce planning, Support data-driven HR strategies. The dashboard is refreshed weekly to ensure updated and accurate reporting for organizational analysis.
